

Low Profile Rotary Actuator

The Low Profile Rotary Actuator from ITT Aerospace Controls is a compact design which allows for applications in areas where height restrictions prevent the incorporation of “chimney” style actuators.

Features

- Permanent magnet motors
- Worm gear drive
- Operates from 28 VDC or 155 VAC 400 Hz.
- Position indication or manual override
- Environmentally sealed enclosure
- Torque ratings to 300 in/lbs.
- Endurance life to 500,000 cycles
- Interface/mounting versatility
- Electrical fail-safe provisions
- Modulating option available
