

Aerospace Products and Services

Our product lines are continually expanding with next generation technologies in interiors and multiple system applications. Leading this cutting-edge development are new components in energy absorption and vibration isolation, control actuation and ECS systems.

Based on our pedigree and problem solving capabilities, our team can provide innovative, cost effective and reliable solutions. Our advanced engineering team continually develops future technologies partnering with our customers to enable technology readiness for the next aerospace platform introduction.

Application Solutions for Today's Aerospace Industry

Motion and Flow Controls

We are leaders in designing, developing and manufacturing fluid control devices and actuators for the aerospace industry. Our product line, which includes linear and rotary actuators, fuel, hydraulic, pneumatic, pumps, valves and electro-mechanical switches, covers a wide range of commercial and military applications.

Our products are qualified worldwide on virtually all commercial aircraft, military aircraft, business jets, helicopters and general aviation aircraft. Aerospace Controls is a major supplier on domestic and foreign military programs for fixed wing, rotary aircraft and land-based equipment.

Products

- Actuators
- Valves
- Pumps
- Switches

Interiors

Enidine designs a variety of vibration isolation and energy absorption products for commercial aviation, military and rotorcraft use. The products include rotary dampers, vibration isolators, UltraLOC seat locks, interior noise absorbers, stow bin actuators, panel isolators, and rate controls. Enidine has offered world-class products for over 30 years for the aviation industry.

Enidine has an expansive list of satisfied customers featuring some of the most well-known airframe, seat, stowage bin, and aircraft manufacturers in the world. With custom and standard product options, Enidine can provide solutions for all of the demanding aviation applications of the modern world.

Products

- Seat Actuation
- Vibration Isolation
- Rate Controls & Actuators
- Noise Attenuation

Environmental Control Systems

For over 75 years Aerospace Controls has developed high quality engineered components for the aerospace industry. With our expertise in ice/freeze protection, noise control, composites, hoses, connectors, drain masts and air/surface heaters we have a solution for critical areas of commercial aircraft systems and environments.

We bring exceptional value to our customers through state-of-the-art manufacturing processes and on time delivery making us a premiere provider of custom engineered components to the aircraft industry.

Products

- Heaters
- Composite Ducting
- Elastomeric Hoses
- ECS Mufflers
- APU inlet and Exhaust Silencers
